

BOOK TALK

DAUGHTERS OF THE NILE

MAY 7

5:00-6:30 PM  
2135 SSMS

*Daughters of the Nile: Egyptian Women Changing Their World* is a book that brings together the stories of women pioneers and achievers in different professional fields. Their inspiring presentations are a stark reminder of the power of women, their resilience, and their accomplishments against many odds.

Since the revolution of 2011, images of Egyptian women have flooded TV screens and print media, concentrating on their trials and tribulations, and their regressive condition. *Daughters of the Nile: Egyptian Women Changing their World* seeks to correct these flawed images by focusing on a group of 38 modern Egyptian pioneers, groundbreakers and achievers, recognized in all professional fields, in six countries on three continents. It also aims to inspire a new generation of women and men to pursue their dreams despite the obstacles they may encounter, and to convince them that the sky is not the limit.

UC SANTA BARBARA
